Gastro rack systems for all needs

»The innovative FRIES rack system sets the standard.«

The needs of the hotel, restaurant and catering industry continually grow, and ever more products are on the market. That is the case for glasses, plates, trays and other pieces that have to be washed.

Whatever your needs may be, we definitely have the right rack for you.

Advantages of the FRIES rack systems

Clixrack 500

CLIX and it's ready!

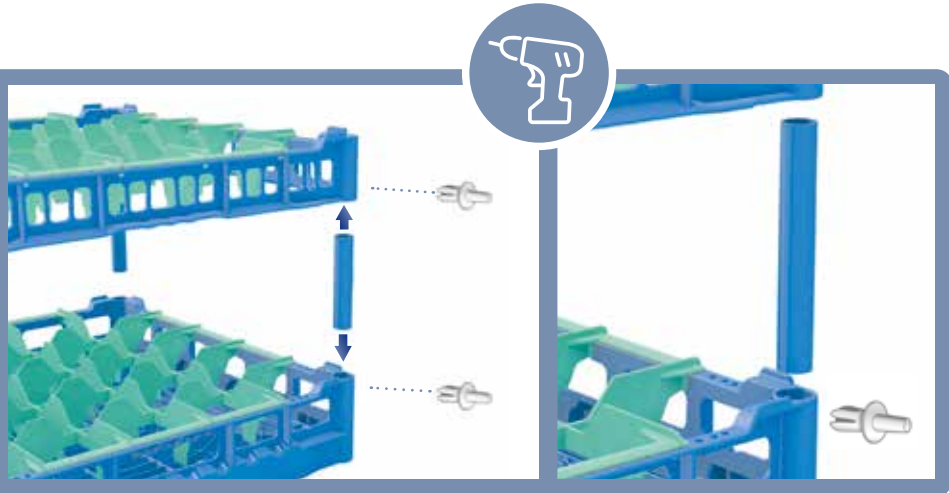

Simple assembly without tools, available in 11 standard heights from 73 to 260 mm.

Customrack 500

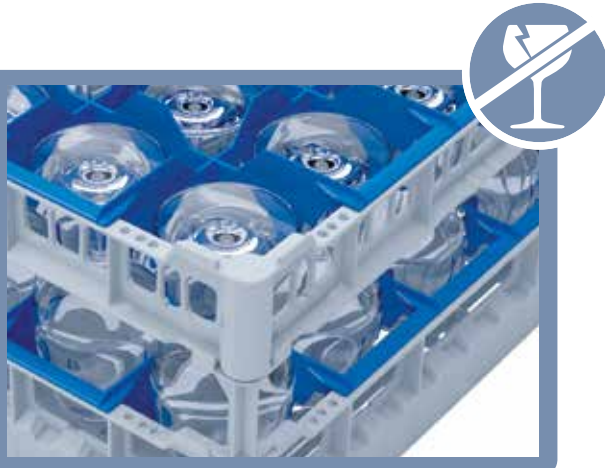

A rack that takes the measure of every glass!

The height of the rack can be precisely adjusted and customized to the height of the glasses.

Less glass breakage and open design

The open rack design ensures water access for a better washing result. Also the glasses dry more quickly. At the same time, the glasses are optimally protected, and the racks can be easily stacked.

Rack system 500
All the advantages
of the rack systems:

www.fries-kt.com

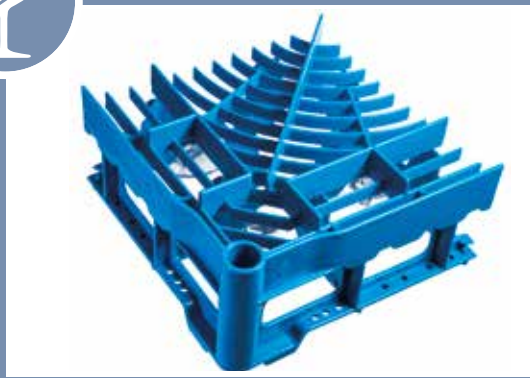

Tilted glasses

The racks can be fitted with tilting clips at customers' request. This allows water to better drain from the bottom of the glasses.

Lightweight and ergonomic

The edges are rounded, and the racks can be easily and comfortably held with the side handles. The racks are lightweight, and their contents can be easily checked.

Duplex bottom

Two bottom levels: the rack's upper bottom holds the items being washed, while its lower bottom serves as a cross piece, ensuring better stability during transport. Less sagging, fewer unwashed spots (narrower webbing) and no damage to the contents from transport hooks.

Choosing the right rack

Measuring chart request our measuring chart here! www.fries-kt.com

Extra Service: Choosing the right rack with the FRIES measuring chart

You can easily find the right type of rack with the help of the FRIES measuring chart. The chart makes it easy to choose the correct compartment size and rack height.

Colour coding and branding

The coloured compartments can be combined with seven different frame colours, making it easy to place glasses in the right rack.

You can also individually design and label your racks by **hot foil embossing** your lettering or logo.

Coding clips in different colours serve as another way to differentiate your glass racks, which can also be embossed.

Other advantages at a glance

- » sturdy and long-lasting
- » stackable
- » polypropylen as approved food compliant material
- » easy to grasp the bottom of glasses when removing them

Gastro Norm runners 530 x 500 mm

Upon customers' request, the FRIES Rack System glass racks are also available as Gastro Norm racks with dimensions of 500 x 530 mm. The side runners make it possible to slide the racks right into Gastro Norm slots. For those racks, the basic rack NK is used with rectangular bottom structure and EWD.

Efficient Wash Design Plus (EWD+)

EWD+ is a further development of the tried and tested Efficient Wash Design (EWD). This patented technology ensures the circulation of the water jet directly onto the critical sections at the rim of the glass or plates held in the first and last rows, respectively.

Even better washing results are achieved thanks to the new, unique open structure of the rack's base, including added details for targeted water deflection directly from the rotating washing arms.

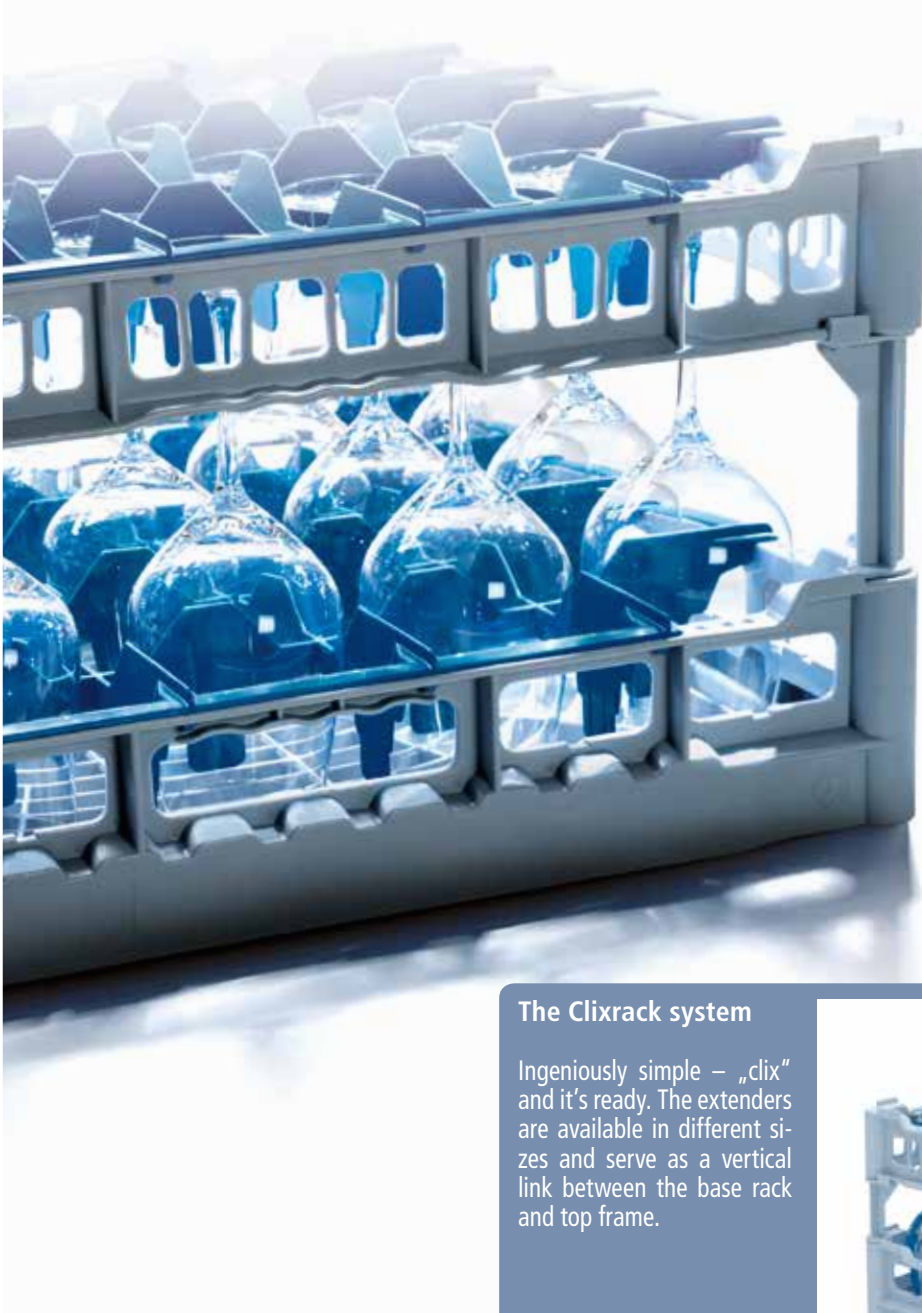

Bright ideas...

... set brilliant standards

Clixrack 500 glass rack the flexible standard

»The rack for your glasses in standard sizes. The ideal solution for transporting, storing and washing the most common types of glasses.«

Our racks can be adjusted to fit your glasses through the use of different Clix extenders, providing a high degree of flexibility. You can easily assemble the racks yourself.

Clixrack 500 at a glance

- » Efficient Wash Design Plus (EWD+)
- » stackable
- » lightweight
- » convertible
- » easy checking of rack contents
- » colour-coded compartments
- » good carrying comfort

The Clixrack system

Ingeniously simple – „clix“ and it's ready. The extenders are available in different sizes and serve as a vertical link between the base rack and top frame.

Clixrack glass racks

max. glass diameter
81 mm

for 36 glasses (6 x 6)
max. glass diameter
74 mm

for 44 glasses (44)
max. glass diameter
67 mm

A rack customized to your glass!

Customrack 500 glass rack custom-made for your glasses

»The customized rack. The made-to-order solution for safely storing, transporting and washing all of your glasses.«

The modular construction of the glass racks in combination with the different colours of the components makes these racks an indispensable part of a modern tableware management system. The design brings current operating costs under control and minimizes labour requirements as the use of resources such as detergent and energy.

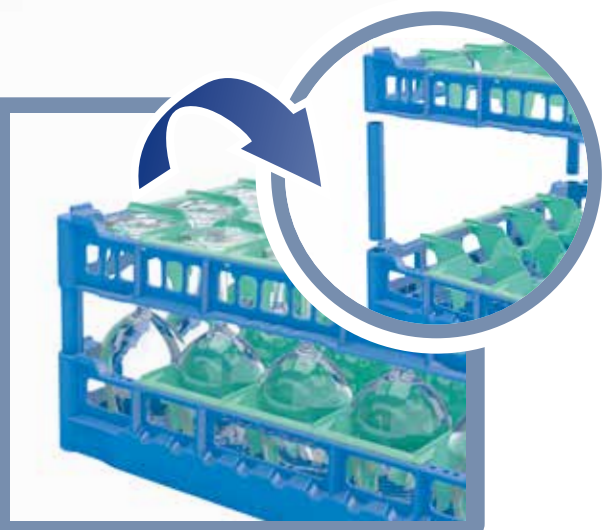

Customrack 500 at a glance

- » Efficient Wash Design Plus (EWD+)
- » stackable

Basys 500 the ideal general purpose rack

»The universal rack for glasses, cups, plates and cutlery.«

Our all-rounder, the Basys 500 is the general purpose rack for multiple uses – ideal for bars, cafés and restaurants. An open bottom and efficient circulation of water over and around items in the interior of the rack lead to perfect washing results.

Basys 500 at a glance

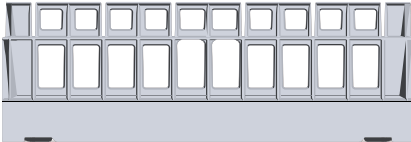

- » Efficient Wash Design Plus (EWD+)
- » modular rack
- » tilting of glasses
- » secure locking with Glasrelax inserts
- » high sidewalls
- » open design
- » less glass breakages

Base rack and examples of use

Base rack (R500)

high sidewalls prevent items being washed from falling out
500 x 500 x 174 mm,
interior height: 150 mm

Combination rack (R500 combi)

with glasrelax insert, plate insert
and cutlery holder

Glass rack (R500-4GR)

base rack with 4 Glasrelax inserts
first row: max. diameter 110 mm
rows 2-4: max. diameter 95 mm

Glass rack (R500-5GR)

base rack with 5 Glasrelax inserts
first row: max. diameter 95 mm
rows 2-5: max. diameter 75 mm

Accessories and available inserts

Plate insert (PI 400)

for washing 9 plates with diameters
up to approx. 24 cm,
plate insert is removable

Cutlery holder (CBS)

pyramid-shaped base
to better separate the cutlery

Drip tray (AWAT 500)

drip tray for the counter

Glasrelax insert (GR500)

for holding glasses in a tilted position

The indent of the Glasrelax guarantees that glasses are securely held in a tilted position and reduces glass breakage. Water drains out better from the bottom of the tilted glasses.

Base racks 500 for all types of tableware

Plates, cups, cutlery, etc. – we have the right washing rack for every piece of tableware. The open design and EWD+ ensure optimal washing results. Additionally, plate racks are equipped with specially designed pegs to prevent the plates from falling over.

Base racks 500 at a glance

- » Efficient Wash Design Plus (EWD+)
- » pyramid-shaped base grid for cutlery baskets
- » special designed pegs on plate racks
- » one rack – for both soup plates and dinner plates
- » bottomless rack P15 for large plates

Base racks

Wide-meshed base rack (NK+)

Raised NK+ base rack (NK 110+) inside dimension 110 mm

Raised NK+ base racks (KH 170+) inside dimension 170 mm additional heights available

Plate racks

Plate rack (P-18-12+)
for 18 dinner plates

or 12 soup plates
